Strong growth across key metrics

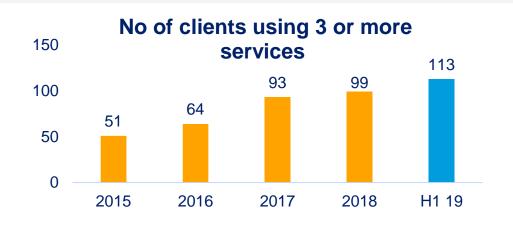

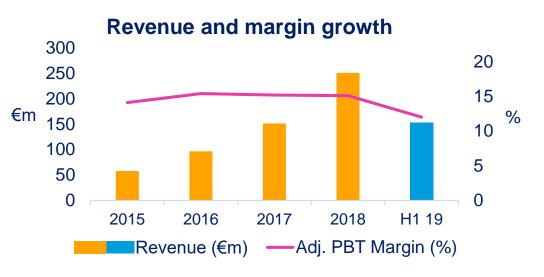

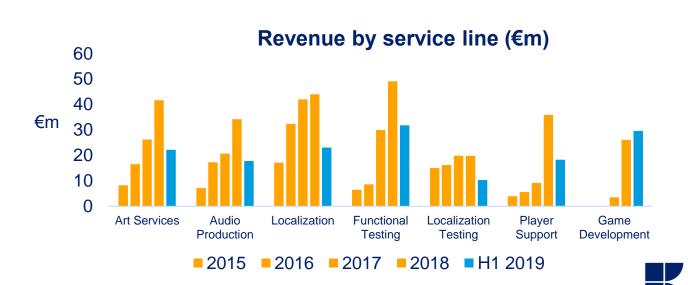

Delivering consistent and diversified growth

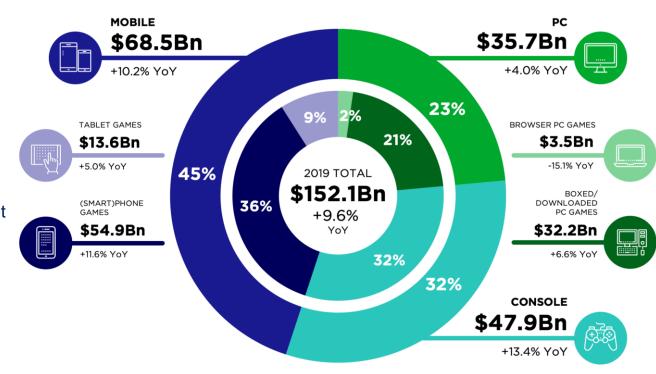

Growing video games market driving more strategic outsourcing

Video games are a rapidly growing, almost \$152bn, niche global market – with expected growth of 9%+ p.a

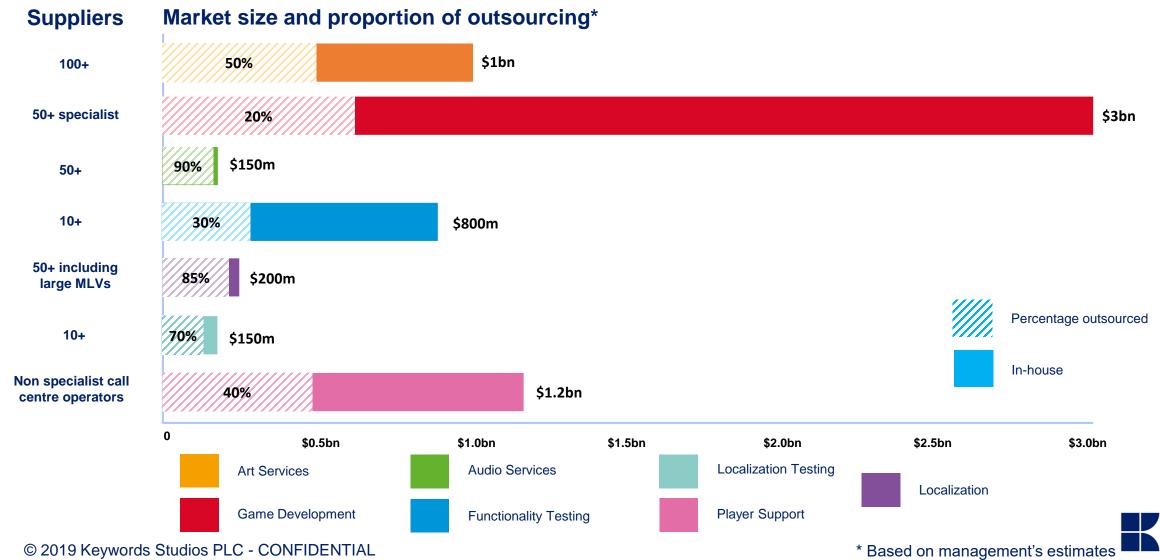

- Increased complexity, volume and speed of content generation has driven the trend towards outsourcing - most of it on a tactical basis
- Expect more strategic outsourcing as publishers focus on what makes their IP unique - vertically integrated models are a distraction
- Keywords has the scale, services and footprint to respond to this acceleration in outsourcing, in an otherwise fragmented service market
- We estimate the services market to be worth over \$6.5bn, with around 40% outsourced today; in film and TV, 90%+ is outsourced
- Cloud based gaming (Netflix of games) is a major theme for 2019
- The new console generation is expected in 2020
- Continued strong growth of both PC and Mobile gaming
